

HURST

JENKINS MARINE

Specialised Workboats & Barges

HURST is a 150m³ dumb Split Hopper Barge, certificated under the MCA with a loadline exemption for operation within the UK coastal waters. Built by Selmer, she is of a proven robust design. HURST can be towed to sea by tug or workboat, and with the benefit of being remote controlled, the dumping operation can be managed by the crew on the tug. She is ideal for dredging operations in restricted locations.

Length	32.0 m	Gross Tonnage	124 tonnes
Beam	6.50 m	Remote Operating	
Draft (Loaded)	2.10 m	Catron Telemotive remote control system	
Draft (light)	0.50m	Aux Engine	Lister ST2
Hopper Capacity	150 m³
