MEXEFLOTE PONTOONS

Mexeflote pontoons have proven to be a versatile solution for working over water. They are road transportable, shallow draft, capable of supporting loads of up to 10 tons per float. They can be assembled to create a wide variety of different sized platforms, from a 30m x 12.5m crane barge to a four pontoon configuration (measuring 11m x 6m) for site investigation works.

Length	6.1 m	Ancillary Equipment Available:
Beam	2.5 m	Bow pontoons with ramps
Depth	1.5 m	End pontoons with swim end
Draft (Light)	0.30 m	Manual and hydraulic spud legs
Weight	5 tons	Detachable spud leg carriers
